177 (S. *candil*), the candle, and the alcohol tin (S. *bote*) in
354 which water is carried and stored. Two of these tins
415 are yoked together and swung over the shoulder. In
482 this device (S. *aguantador*), of course European in
562 character, water is hauled by the men. A woman carries only a single tin.

178 A domestic shrine is found in most houses. This may
352 be no more than a printed or painted picture of a saint, but more commonly it is a carved and painted wooden figure, usually a Virgin or a Christ. This may be only a few inches high, or as much as six feet. Most are from early Colonial times. In front of this figure
782 an incense burner (S. *sahumeria;* N. *popochcomitl*) is
178 placed. This is of black glazed pottery. In it copal
352 gum is burned. Flowers are also placed before the figure, in bottles or vases, and pictures of other saints are hung near the image. This shrine is the center of domestic worship and ritual. Candles are burned before it on feast days; here the infant Christ is "put to bed" on Christmas Eve and taken up on Candlemas;
527 before this image are placed gifts brought on birth-
584 days or those brought by a boy's parents during the negotiations leading to a marriage with a daughter of the house.

353 Any property not in use is kept on plain wooden shelves or in covered wooden chests. Extra clothing is hung on nails. Walls are frequently decorated with pictures cut from newspapers, with sentimental picture postcards, and with little clay toys and ornamental dishes brought from other villages.

earth. Most of the younger people of the village view beds as a desirable luxury. Pillows, mattresses, pillowcases, sheets, and bedspreads are found in only a few Tepoztecan homes. A wool serape is all the bedding known to the majority of the population.

Sleeping arrangements vary somewhat from family to family, but the most widespread custom is for the parents to share their *petate* with the children of about two to six years of age who sleep between them. This is also true when a bed is used. The nursing baby sleeps on the other side, next to the mother. Cradles are used only during the day. Older children sleep apart, the girls sharing one *petate* and the boys another. In homes with more than one room the parents and small children sleep in one room and the older children in the other; in few homes are there enough rooms to permit the separation of older brothers and sisters. Sometimes parents are embarrassed to lie down together in the presence of their children, and the mother sleeps with the daughters while the father sleeps with the sons.

Most homes have a makeshift altar in the main room of the house. This is usually a table on which are placed candles, flowers, incense burners, and images of saints. These images are highly prized and occupy a prominent place in the home. Some families have large images of Jesus, Mary, or one of the saints, which have been in the family for many generations. Religious pictures are hung on the wall over the table, and frequently there are tissue paper decorations arranged around the table. (See Fig. 39.)

Wooden boxes and one or two wooden chests are used for storage of clothing, blankets, and other personal property. Extra clothing in regular use is hung on

nails and now, not infrequently, on wood or wire clothes hangers purchased in Cuernavaca. Clothes closets are used only in a very few well-to-do homes in the center of the village. Food, except corn and beans, does not present a storage problem, since it is purchased in small quantities for immediate consumption. A few cans, bottles, jars, and baskets usually suffice to take care of current food. But the more modern or acculturated the family, the greater the number of storage facilities.

The family supply of corn presents the most important storage problem. For this purpose separate structures resembling corncribs are built in the family patio. Redfield describes these as follows:

> The storehouse (S. *troje*) is practically always present, and is usually placed immediately in front of the dwelling. It occurs in three forms, all of which are probably of entirely pre-Columbian design. The *ohuatlapil* (N. *ohuatlapilli*) is most common. This is circular, about six feet high and of varying diameter; it is made of vertical cornstalks bound together with rope. It contains maize on the cob (S. *mazorca*). Also made to contain *mazorca* is the *cincolote* (N. *zincolohtli*). This is square, of poles laid horizontally, one pair upon another at right angles to the first until the structure is raised tall enough to contain the maize to be stored. The *cuezcomate* (N. *cuezcomatl*) is a vasiform granary, plastered inside and out with clay. In it is kept shelled corn.[9]

The *cuescomatl* is now a rarity in Tepoztlán, since most of them have been dismantled or allowed to fall in ruin. They are considered very primitive in appearance, and the few families who still own them are not keeping them in good repair and obviously do not take pride in them, although some of them are over a hundred years old. Now shelled corn is stored inside the house in large sacks made of *petates* sewn together, in large baskets, or in burlap bags.

The sewing machine has, as Redfield put it, "become a part of the general Tepoztecan material culture; it is found in all parts of the village and in houses otherwise Indian in character." At present there are 215 sewing machines in Tepoztlán, owned by 25.3 per cent of the families. This is a relatively high proportion in comparison with other rural areas. The average distribution in rural areas throughout Mexico is 15.6 per 100 families; the average for both rural and urban areas in the nation is 22.5 per cent.

Although sewing machines are apt to be found in the poorest homes, as well as in well-to-do homes, there is a high correlation between degree of wealth and ownership of sewing machines. We find such ownership in 76 per cent of Group III, 39 per cent of Group I–C, and 10 per cent of Groups I–A and I–B. It is interesting to note that among Groups I–A and I–B there is a considerable number of families who own no property except a sewing machine. The few wealthy families who do not have their own machines either have little need for one or have all their clothing made by a local seamstress. The 215 machines in Tepoztlán service many more than that number of families, since it is customary to lend or rent machines to relatives and neighbors, and most machines are in continuous use. Indeed, it may be said that one of the secondary but not unimportant effects of the sewing machine
